Re: April 2011 Monthly Report for UAO and April 2011 Monthly Report for Settlement
Agreement, Gulfco Marine Maintenance Site, Freeport, Texas

Dear Mr. Miller and Ms. Engblom:

Pastor, Behling & Wheeler, LLC (PBW) has prepared this monthly report on behalf of the Respondents LDL Coastal Limited LP (LDL), Chromalloy American Corporation (Chromalloy) and The Dow Chemical Company (Dow) pursuant to Section XII, Paragraph 53 of the amended Unilateral Administrative Order (UAO) and Section VIII, Paragraph 41.a of the Administrative Settlement Agreement and Order on Consent for Removal Action (Settlement Agreement) for the above-referenced Site. Parker Drilling Offshore Corporation is participating in the Site work under an agreement it reached with the above Respondents. As discussed in my telephone conversation with Mr. Miller on August 2, 2005, regarding the UAO, monthly status reports for a given month will be submitted by the 15th of the following month as required in Paragraph 53 of the UAO, rather than by the 10th of the following month as indicated in Appendix 1 of the Statement of Work (SOW) attached to the UAO. The Settlement Agreement requires submittal of a progress report by the 15th of every month.

In accordance with the UAO requirements for the Remedial Investigation/Feasibility Study (RI/FS) this report addresses the topics listed below:

1. Actions which have been taken toward achieving compliance with the UAO during the previous month -- The following actions were taken during the previous month:
 - Risk Assessment activities (SOW Paragraph 37) detailed under Task 7 of the Remedial Investigation/Feasibility Study (RI/FS) Work Plan, including preparation and shipment of replacement pages for the Final Baseline Ecological

Risk Assessment (BERA) Report (approved by EPA's April 6, 2011 letter) to EPA on April 15, 2011;

- RI Report activities (SOW Paragraph 39) detailed under Task 9 of the RI/FS Work Plan, including preparation and shipment of the Final RI Report to EPA on April 6, 2011; and
- FS activities (SOW Paragraph 44) detailed under Task 10 of the RI/FS Work Plan, including preparation and shipment of the Draft FS Report to EPA on April 14, 2011.

2. Results of RI/FS sampling, tests, modeling and all other data (including raw data) received or generated by or on behalf of Respondents during the previous month – No new analytical data were received during the previous month.
3. Actions, data and plans which are scheduled for the next two months and other information relating to the progress of RI/FS work – The following actions are planned for the next two months:
 - Submittal of replacement pages for the Final RI Report (based on EPA's approval with modifications of the Final RI Report received on April 22, 2011); and
 - Preparation and submittal of the Interim Final FS Report, pending receipt of EPA comments on the Draft FS Report.

SOW Paragraph 42 requires that the Respondents conduct a presentation to the EPA within 15 calendar days following submission of the Final RI Report. In an April 27, 2011 e-mail, Mr. Miller indicated that such a presentation would not be necessary. The Respondents are currently awaiting a letter from EPA confirming its waiver of this SOW requirement.

4. Information regarding percentage of completion, all delays encountered or anticipated that may affect the future schedule for completion of the work required, and efforts made to mitigate those delays or anticipated delays – RI/FS activities are approximately 95% complete.

In accordance with the Settlement Agreement requirements, this report also addresses the topics listed below for the Removal Action:

1. Significant Removal Action developments during the preceding period, including actions performed and any problems encountered – No actions were taken during the previous month.
2. Removal Action analytical data received during the reporting period – No new analytical data were received during the reporting period.
3. Removal Action developments anticipated during next reporting period, including a schedule of actions to be performed, anticipated problems, and planned resolutions of past or anticipated problems – The only remaining Removal Action activities are the preparation and submittal of a Removal Action Report Addendum following receipt of all outstanding disposal manifests from the Removal Action contractor. It is anticipated that this addendum will be submitted during the next reporting period.

Mr. Gary Miller and Ms. Rita Engblom
